Answer Sheet Scanner User Manual

Answer Sheet Scanner software allows you to evaluate answers for MCQ type exams using simple scanners. The bubble sheets can be scanned using simple inexpensive scanners and the result can be achieved quickly.

Configuring the company information:

Click on “Configuration” in the left bottom pane and “Setup” in the left top pane. The Company Information form opens up. Enter the Name, Address, Contact number and logo of your company / institute and click “Save” to save to the company details. The company name configured here is printed as a header in the Results.

The screenshot shows the 'Answer Sheet Scanner' software interface. The title bar indicates 'MERIT STUDENTS Answer Sheet Scanner Premium Version 5.0'. The left sidebar contains a menu with 'Setup' (highlighted in red), 'Setting', 'Student Records', 'Test Setup', 'Evaluation' (checked), 'Configuration' (highlighted in red), and 'Quit'. The main window displays the 'Company Information' form with the following fields and values:

Field	Value
Name :	Techior Solutions Pvt Ltd
Address :	Godavari Complex, Hingana T Point, Hin Road, Nagpur
Contact No. :	54564
Select Logo :	D:\Ashish Development\For Vishal Jain\OMR_Latest\Te
Logo Preview :	

Buttons for 'Browse', 'Remove Logo', 'Save', 'Clear', and 'Exit' are present at the bottom of the form.

Configuring the Setup:

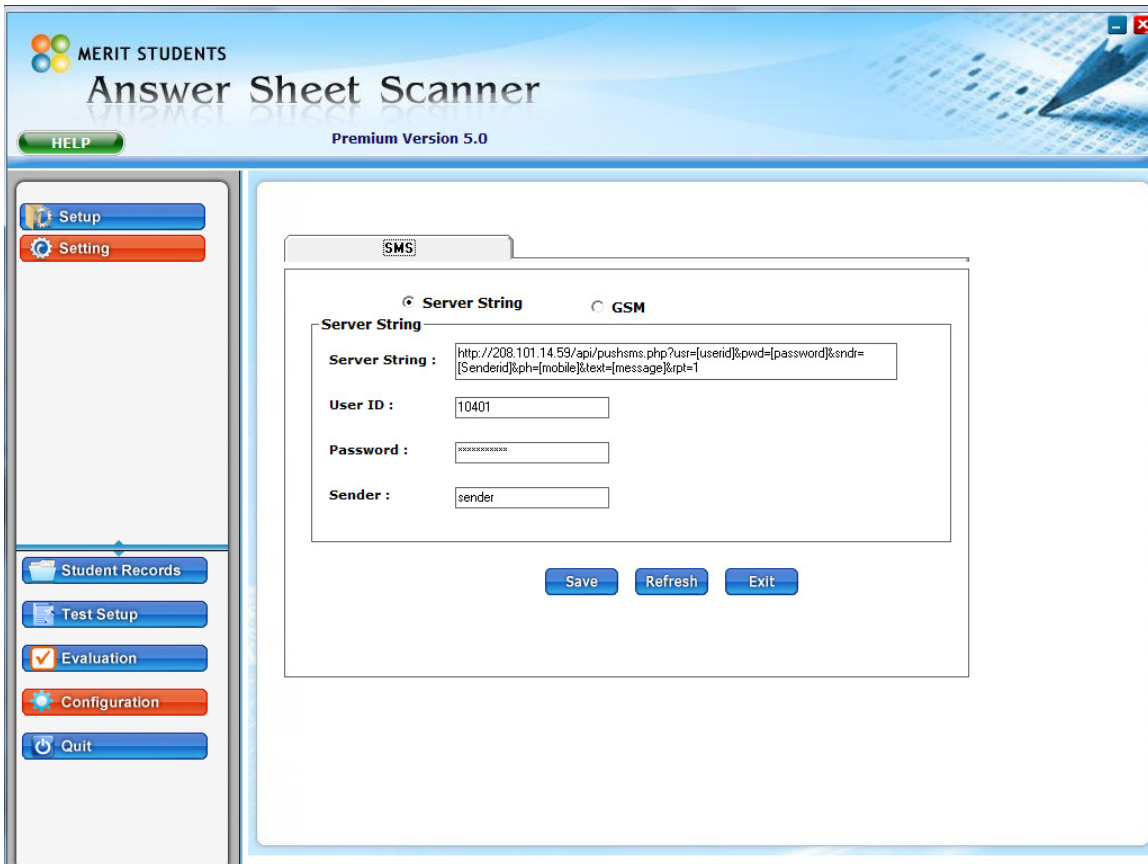

Click on “Configuration” in the left bottom pane and “Settings” in the left top pane.

The settings form opens up. Here SMS settings can be saved. You can choose to send SMS using any one of the following 2 methods:

1. Bulk SMS Service
2. Using GSM

Bulk SMS Service:

Choose the “Server String” Option. Here you can configure the SMS server details along with user-id and password which will be used to send SMS about fees reminders, test marks, attendance to a selected group of students.

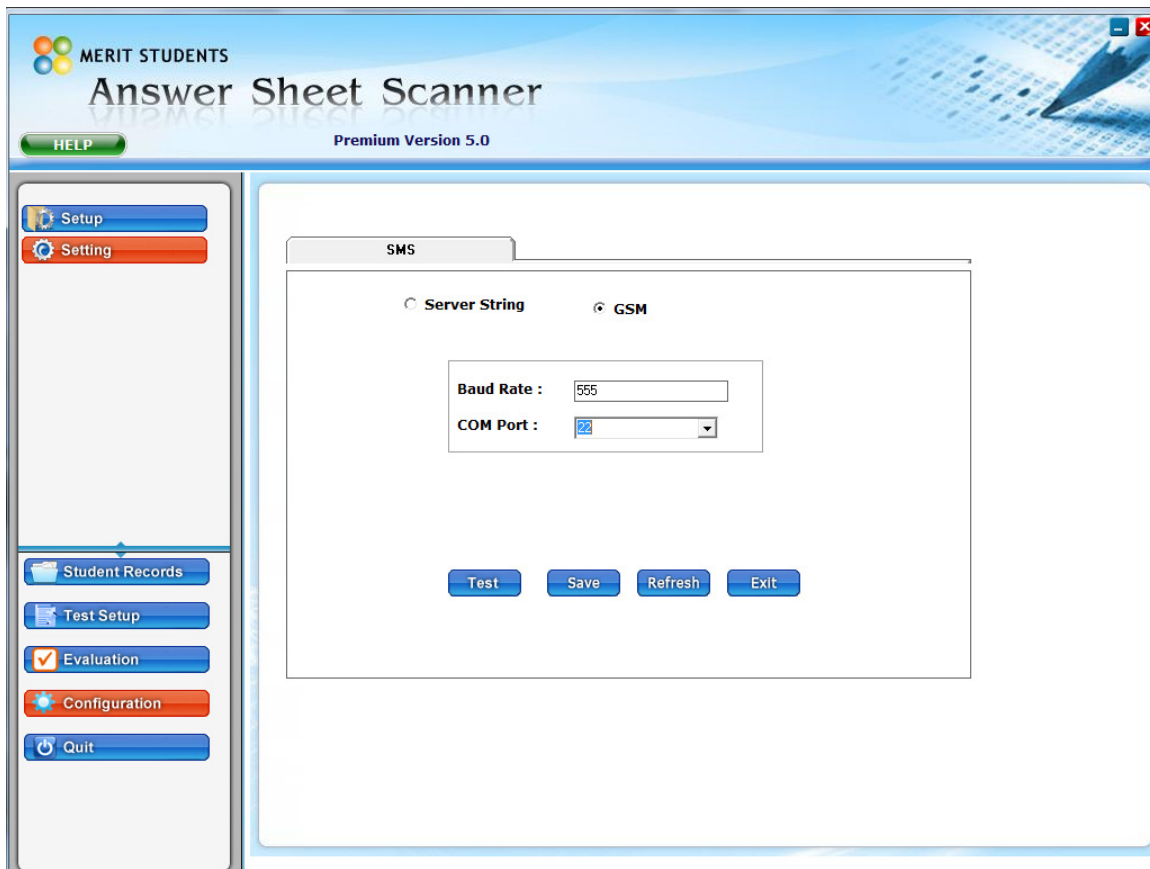

The screenshot shows the 'Answer Sheet Scanner' application window. The title bar includes the 'MERIT STUDENTS' logo and the text 'Answer Sheet Scanner Premium Version 5.0'. A 'HELP' button is located in the top left. The left sidebar contains a menu with 'Setup' and 'Setting' buttons at the top, and 'Student Records', 'Test Setup', 'Evaluation' (checked), 'Configuration' (highlighted), and 'Quit' at the bottom. The main area displays the 'SMS' configuration window. It has two tabs: 'Server String' (selected) and 'GSM'. Under the 'Server String' tab, there are four fields: 'Server String' (containing a URL), 'User ID' (containing '10401'), 'Password' (masked with asterisks), and 'Sender' (containing 'sender'). At the bottom of the configuration window are three buttons: 'Save', 'Refresh', and 'Exit'.

Using GSM:

Please download and install the PC Suite Software for your phone on your desktop / laptop. Now connect your phone with your computer using the USB Cable.

Note: To find the COM Port and Baud Rate, Right Click on “My Computer” and select “Manage”. Select “Device Manager”. In the device listing, double click on “Modems” to open the list of modems installed. Now “Right-click” on your phone modem (E.g. Nokia / Samsung) and click on “Properties”. Please make a note of the Com Port and Baud Rate mentioned in the “Properties” window.

Now choose the GSM option from Configuration > Settings tab. Here you need to specify the Com-Port and Baud Rate at which your phone is connected to the computer.

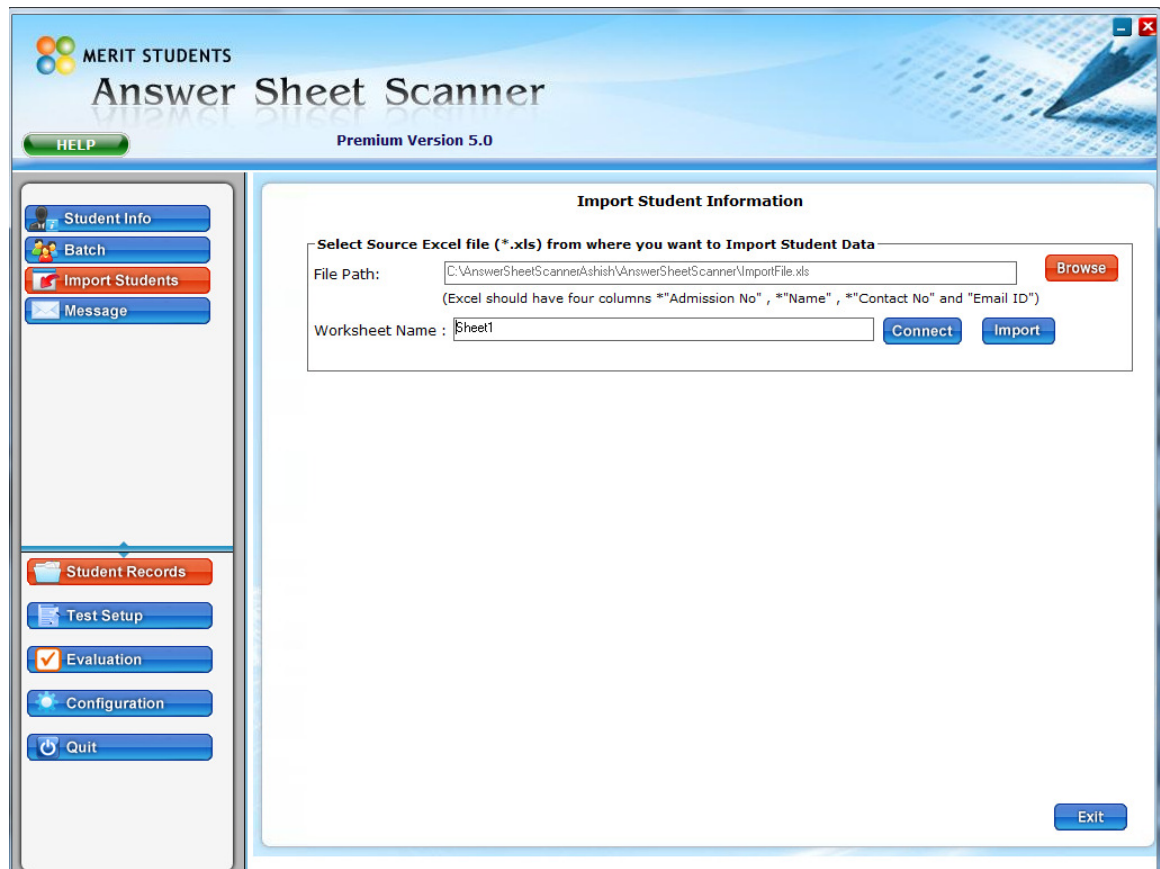

Creating the Student data:

Click on “Student Records” on the left bottom pane.

You can add the student data one by one or import it from an excel sheet.

1. Click “Import” in the left top pane. Select the spreadsheet with the student data. The sheet should contain two columns RollNo and Name. Click “Import” button to import all the data from the spreadsheet into the database.

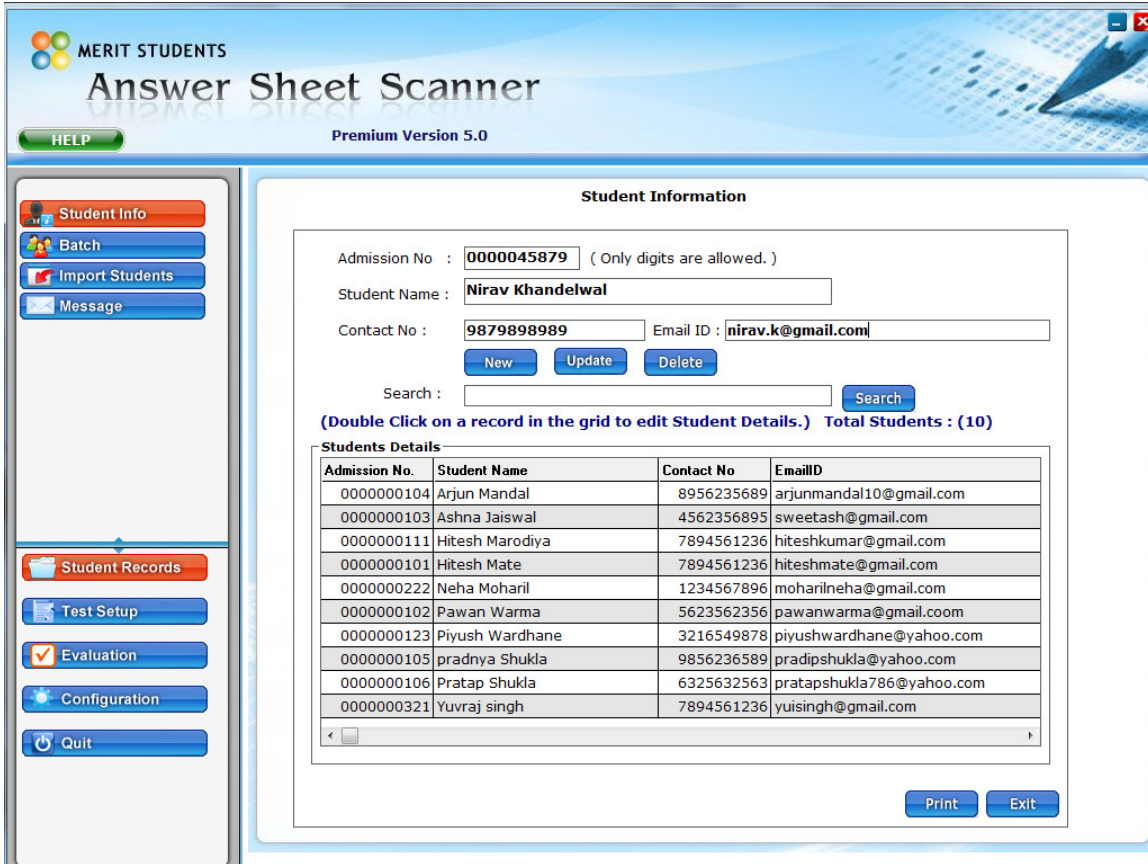

2. Click on “Student Info” in the left top pane. Click on “New” button to add a new student. Enter the Roll number and the name of the student. Click “Save” to add the student details to the database.

To update a student details, double-click the student from the student list in the grid, make the necessary changes and click “Save”.

To delete a student, select the student from the student list in the grid and click “Delete”. To delete multiple students, two options are available:

- Select a student and drag the mouse downwards without releasing the left click to select multiple students. Once selected, click “Delete” and choose “Yes” on the Pop-up Message.
- Select a student, press “Left Shift Key” on the keyboard and use the “Down Arrow Key” without releasing the shift key, to select multiple students. Then click on “Delete” and choose “Yes” on the Pop-up Message.

Batch Management:

You can group the students logically by adding them into a batch. While viewing the results of a test, you can choose to view the result batch wise. In order to create a batch, select “Student Records” on the left bottom pane and select “Batch” on the left top pane. Click “New Batch”. Enter the name of a batch. The list of available students is displayed at the bottom. Select the students which you want to add to this batch and press the “>>” button to add the students to the batch. Click “Save” to save the batch.

To modify a batch, double-click on an existing batch from the list of batches in the grid. Add/remove student(s) by shifting them from the “Available Students List” to “Students in this Batch” using “>>” and “<<” buttons respectively. Then click on “Save” to save the changes made to the batch.

To delete a batch, select a batch from the list of batches in the grid. Click “Delete Batch” and select “OK” on the Pop-up Message.

To delete a batch along with its students, select a batch from the list of batches in the grid and Click “Delete Batch and Students” and Select “OK” on the Pop-up Message.

Note: Use “Delete Batch with Students” with caution as this operation deletes the batch as well as all the students in the batch permanently from the database.

Creating the Master Answer Sheet:

The Master Answer Sheet is a sheet in which the correct answers of a test are stored. The answers marked in the student answer sheets are compared with those in the Master Answer Sheet to evaluate the students.

Select “Test Setup” from the left bottom pane and “Master Answers” from the left top pane of the application.

There are three ways in which you can create the Master Answer Sheet:

1. Load from Test Generator
2. Scan Master Answer Sheet
3. Enter Answers Manually

1. Load from Test Generator:

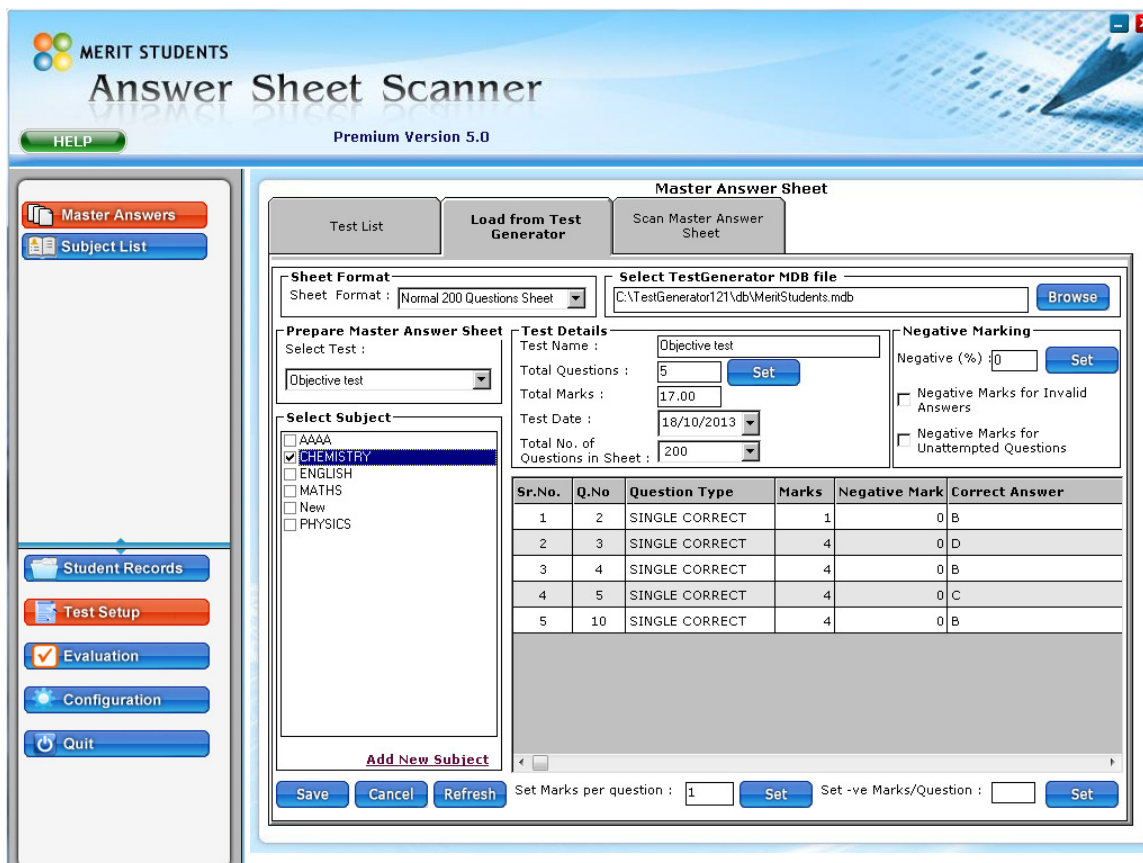

If you are already using the Test Generator product from Techior Solutions Pvt Ltd and you have created the test using Test Generator, then the Master Answer Sheet can be created directly from the Test Generator database as the questions in the test and the correct answers are already available in Test Generator database.

Simply click on “Load from Test Generator” tab. Select sheet format from dropdown ,by using the “Browse” button, select the Test Generator mdb file.

Path:(C:\TestGenerator\db\MeritStudents.mdb)

Then use the drop down to select the test for which the Master Answer Sheet is to be prepared.

Enter a test name in the “Test Name” field. This is the name used for the test in the Answer Sheet Scanner software. Enter negative marks (in percentage, if any), date of the test and click “Save” to import the correct answers from the Test Generator database.

3	4	SINGLE CORRECT	4	0	B
4	5	SINGLE CORRECT	4	0	C
5	10	SINGLE CORRECT	4	0	B

Set Marks per question : 1 [Set] **Set -ve Marks/Question :** [Set]

Save Cancel Refresh

2. Scan Master Answer Sheet:

You can create the Master Answer Sheet by manually marking the correct answers on a bubble sheet (similar to the sheet used by the students), scanning that sheet and storing the answers in that sheet as correct answers. The bubble sheet in which the correct answers are marked manually can be scanned using any regular scanner. Save the scanned image at any known location.

Click on “Scan Master Answer Sheet” tab. Select the sheet type.

Four types of sheets are supported:

1. Normal 100 questions sheet.
2. Normal 200 questions sheet.
3. JEE Paper - I
4. JEE Paper - II

The samples of the sheets are shown below.

1. Normal 100 questions sheet.

Enter the number of questions in the test. Even if the bubble sheet contains 200 questions, the test can be taken for less than 200 questions. For example, if you enter 100 in this field then only the first 100 questions will be considered, the rest will be ignored.

If you have already scanned the master answer sheet and saved the scanned image, you can use “Browse” button to select the scanned master answer sheet image. Otherwise you can use “Scan” to connect to a scanner and scan the image of the master answer sheet. You will be asked to provide a location where the master sheet is to be saved. Once the image of the master answer sheet has been saved, click “Evaluate” to retrieve the correct answers from the scanned image. Then enter the name of the test in “Test Name” field, enter negative marks (in percentage or per questions), date of the test and click “Save” to save test information along with the correct answers obtained from the master answer sheet.

Here you can also specify if the test has negative marking and how to evaluate the unmarked and invalid answers (multiple bubbles marked for a single questions) in a student answer sheet. You can either give negative marks for unmarked and invalid answers (tick the corresponding checkboxes) or you can give zero marks for these (do not tick the checkboxes).

3. Enter Answers Manually:

The Master Answer Sheet can also be created by manually entering the correct answer for each question manually directly in the Answer Sheet Scanner.

Select sheet format (Normal100/200 questions)

Tick on “Enter Answers Manually” checkbox.

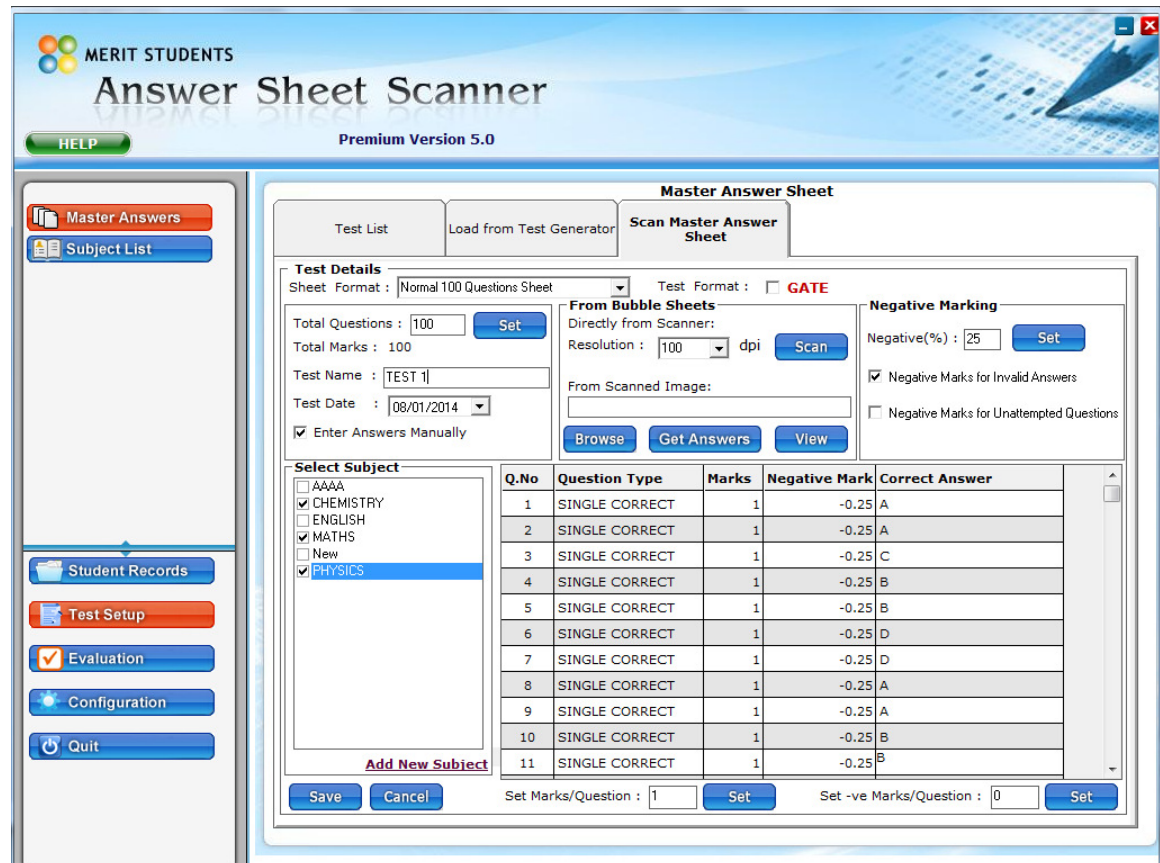

Enter the total number of questions in the test and click on “Set”.

A grid appears on the right side of the form with the given number of questions, correct answer and marks for each question.

Enter the Correct Answer option for each question in the grid.

Then enter the name of the test in “Test Name” field, enter negative marks (in percentage or per questions), date of the test and click “Save” to save the master answer sheet.

Here you can also specify if the test has negative marking and how to evaluate the unmarked and invalid answers (multiple bubbles marked for a single questions) in a student answer sheet. You can either give negative marks for unmarked and invalid answers (tick the corresponding checkboxes) or you can give zero marks for these (do not tick the checkboxes).

Adding Subject Information:

Click on Subject List tab. Enter the subject name and the passing marks for the subject and click “Save”. If a student scores less than the passing marks in a particular subject, then the report will show “Fail” for that student in that subject. You can double-click on any subject in the grid to modify the passing marks at any time.

Subject

Subject Name :

Passing Marks : (Enter either 0 or number value between 1 to 199.)
(Used for Pass/Fail determination.)

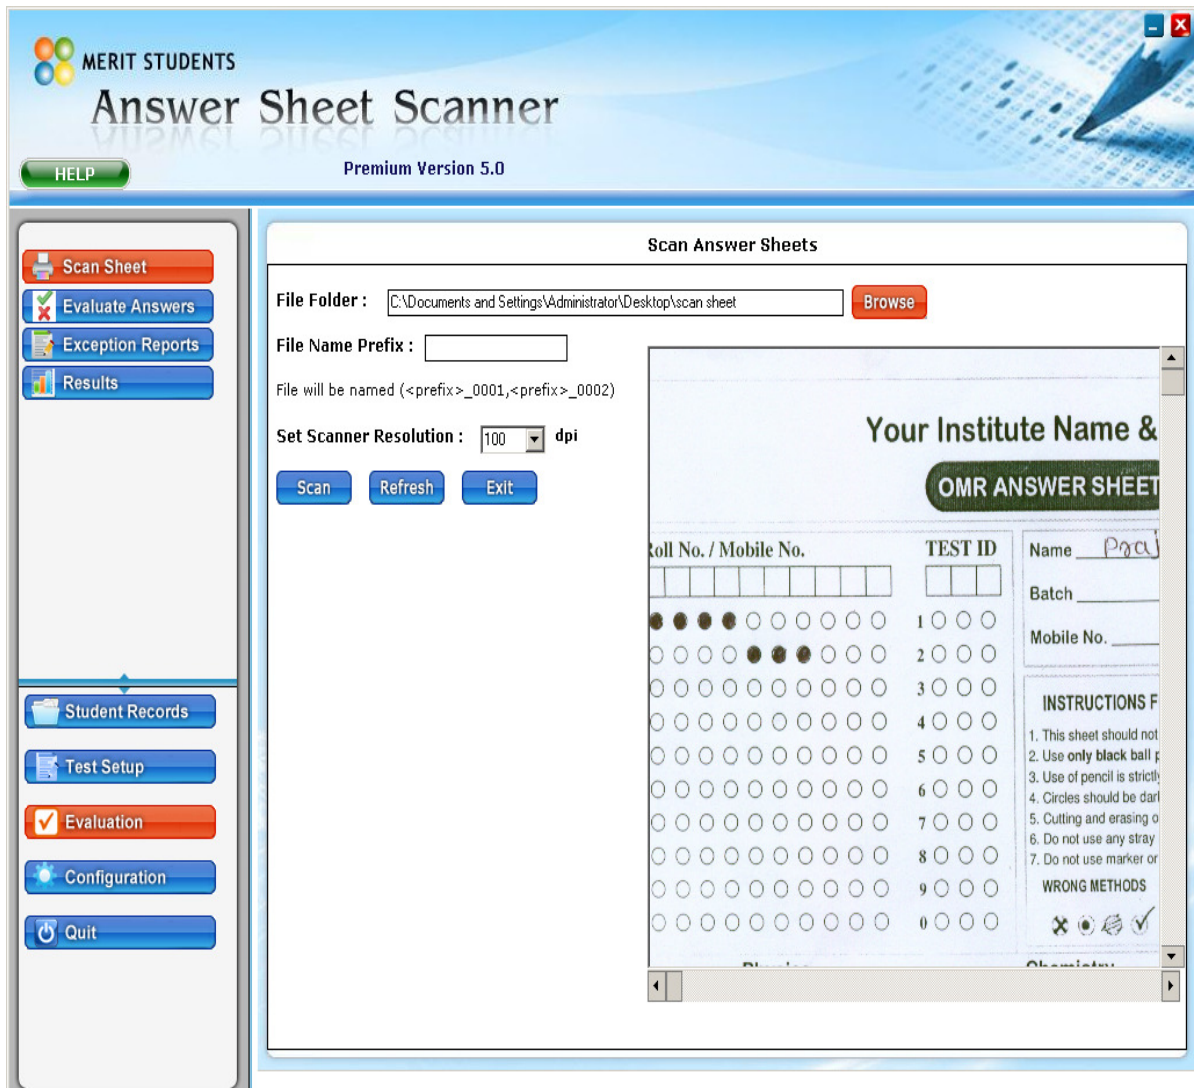

Double Click on a record in the grid to edit Subject Details. (4)

Sr.No.	Subject Name	Passing marks
1	CHEMISTRY	2
2	ENGLISH	0
3	MATHS	0
4	PHYSICS	20

Scanning the Answer Sheets:

Once the Master Answer Sheet has been created, the next step is to scan the student answer sheets. You can scan the bubble sheets in which students have marked the answers using any scanner and save the image files in a folder. Make sure that you set the scanner to 100/200 dpi while scanning the images.

You can also scan the student answer sheets from Answer Sheet Scanner itself. To do this, connect the scanner to the computer where the software is installed. Select “Evaluation” from the left bottom pane and “Scan Sheet” from the left top pane. Click “Browse” to select the name of the folder in which you want to save the images. Specify a prefix to be given to the filenames. Click “Scan” to scan the image and save the file. The student answer sheets will be stored using the name <prefix>_0001, <prefix>_002 and so on. This is an easy way to scan multiple answer sheets quickly.

Evaluating the Answer Sheets:

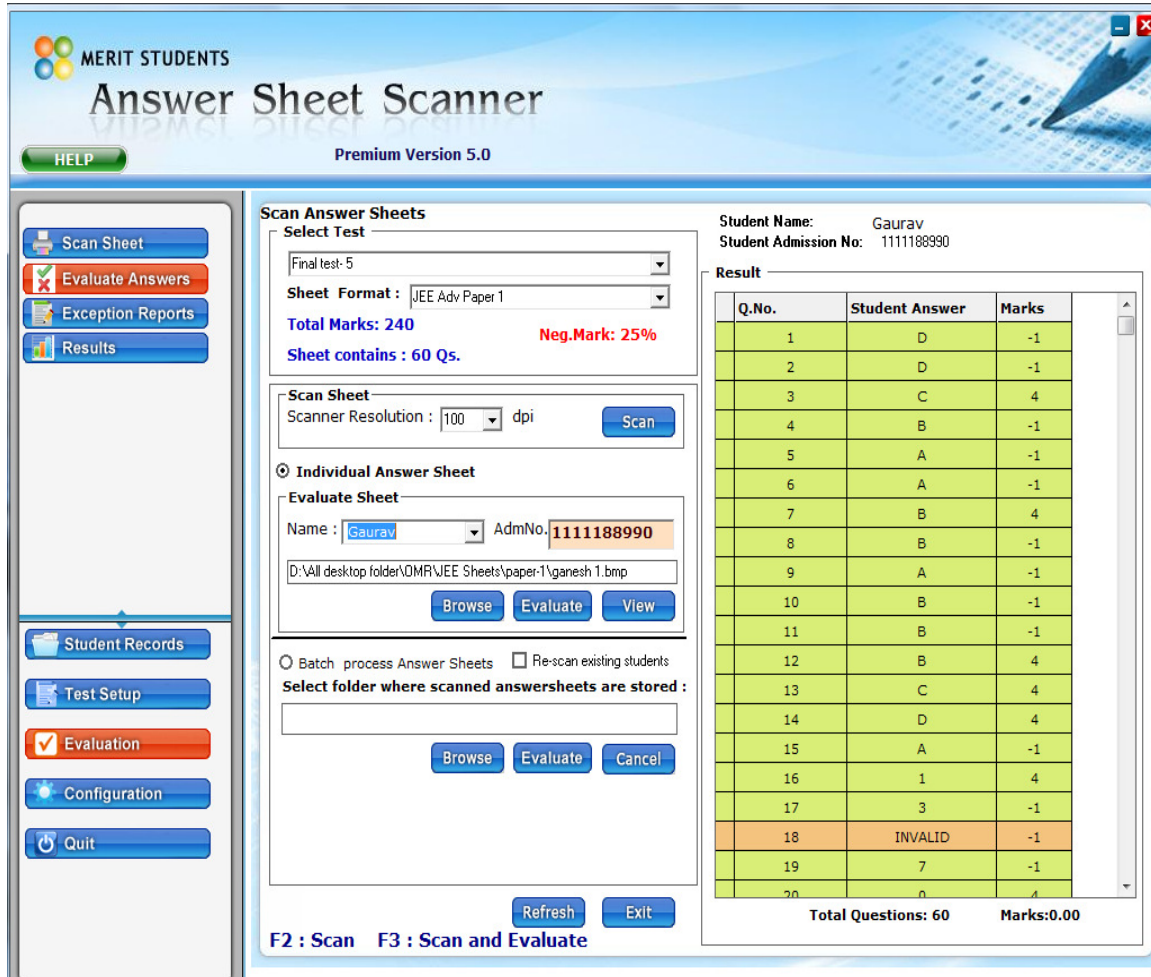

After the answer sheets have been scanned, the next step is to read the answer options from the scanned sheets and compare them against the options marked in the master answer sheet.

Select “Evaluation” from the left bottom pane and “Evaluate Answers” from the left top pane.

Select the name of the test – this is the same name that you provided while saving the Master Answer Sheet.

You can scan each answer sheet one by one or scan all the answer sheets in a batch (the scanned images of all the answer sheets to be evaluated should be stored in a folder).

1. To see the score of a single student, you can select “Individual Answer Sheet” option. Click “Browse” to locate the image of the student’s bubble sheet. Then click “Evaluate” to read the answers from the image and compare them to the answers given in the Master Answer Sheet. Immediately, the grid on the right side of the form is populated with the answers from the selected student’s answer sheet and the marks are also allocated.

Total Questions: 60 Marks:0.00

You can use the “View” button to see a preview of the scanned image of the bubble sheet of the selected student.

The screenshot displays the 'Answer Sheet Scanner' software interface. On the left is a sidebar with buttons: 'Scan Sheet', 'Evaluate Answers', 'Exception Reports', 'Results', 'Student Records', 'Test Setup', 'Evaluation' (highlighted), 'Configuration', and 'Quit'. The main window shows a 'Preview' of an 'OMR ANSWER SHEET' for 'JEE Adv. Paper'. The form includes fields for 'Roll NO. / Mobile No.', 'TEST ID', 'Name', 'Batch', 'Mobile No.', and 'Test Date'. It also contains 'INSTRUCTIONS FOR FILLING THE SHEET' and a section for 'Candidate' and 'Invigilator' signatures. The answer grid is divided into three columns: 'Physics' (questions 1-5), 'Chemistry' (questions 21-25), and 'Mathematics' (questions 41-45). Each question has four options (A, B, C, D) represented by bubbles. Some bubbles are already filled in the preview.

2. To evaluate the answer sheets of a complete batch, you can select “Batch process Answer Sheets” option. Click “Browse” to locate the folder in which the bubble sheet images of the batch have been stored. Then click “Evaluate” to read the answers from the images in the folder one by one and compare the answers in each scanned image to those given in the Master Answer Sheet.

Seeing the scan reports:

Sometimes there can be errors while scanning the bubble sheets, e.g. the sheet was placed incorrectly in a scanner at a slanting angle, the roll no read from the sheet was not found in the database, or the roll no was not entered at all in the sheet.

In such cases, the Answer Sheet Scanner will be unable to read the correct answers from the scanned image and hence it fails to evaluate the sheet. The number of erroneous sheets is shown in the Results summary.

Select “Evaluation” from the left bottom pane and “Exception Reports” from the left top pane to see the Test Scan Reports. Select the test in which erroneous sheets have been found. This gives the list of students whose sheets have not been scanned properly. Select the students one by one using the checkbox against the name of the student. You can correct the erroneous sheet using any one of the following two methods:

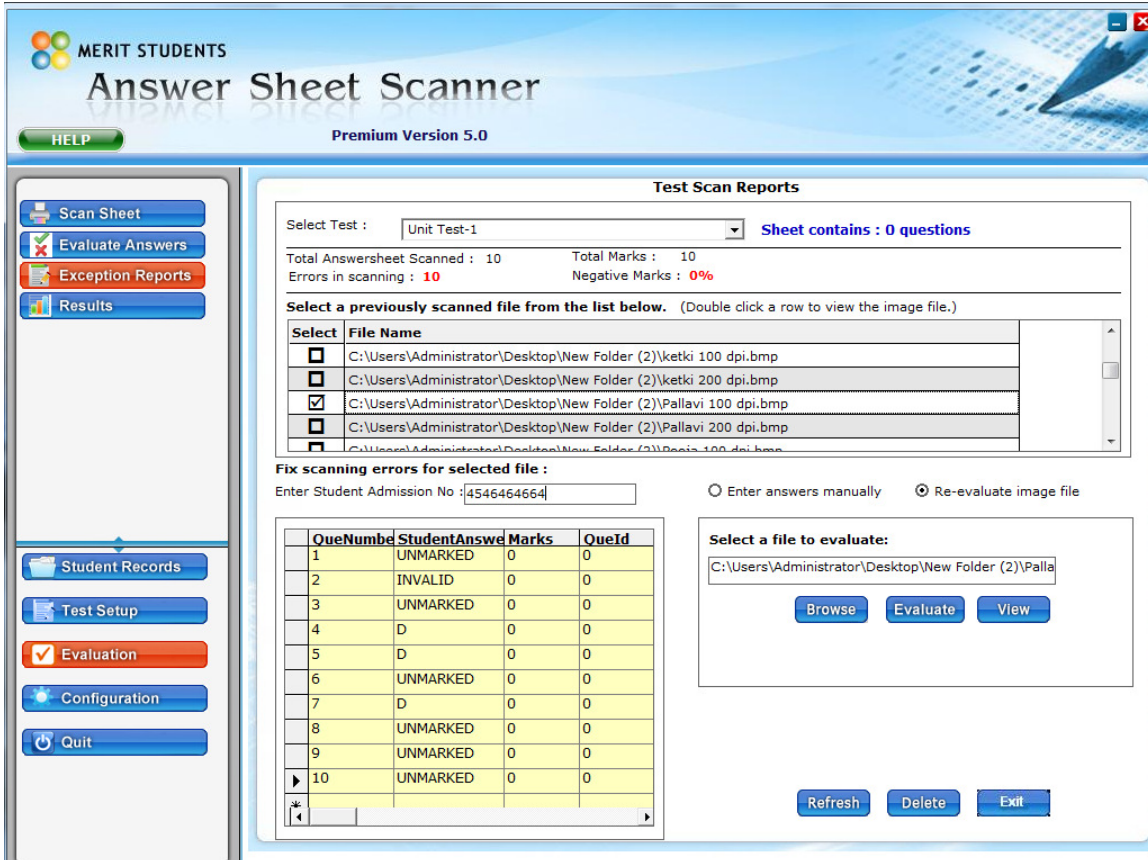

1. **By entering the answers manually:** Select the “Enter answers manually” option. Enter the Roll number of the student manually and then enter the answer options marked by the student for each question manually in the grid which is provided below. Once you have entered all the answer options, click “Save” to save the options marked.

O.No.	Student Answer	Marks
1	A	0
2	B	0
3	A	0
4	B	0
5	A	0
6	B	0
7	C	0
8	C	0
9	C	0
10	C	0
*		

Buttons at the bottom: Save, Refresh, Delete, Exit.

2. **By re-scanning the answer sheet:** Select the “Re-scan image file” option. Scan the answer sheet of the selected student again and use “Browse” to select the image file of the re-scanned answer sheet. Then use “Evaluate” to read the answers from the new image and evaluate the student by comparing the answers in the re-scanned sheet to those in the Master Answer Sheet. You can use “View” to see the scanned answersheet.
Finally, press “Save” to save the result of the selected student in the test.

Sr.No.	Show Report	Test Name	Total Marks	Marks Obtained	Date
1	<input checked="" type="checkbox"/>	Objective test 1	14	4.00	18/01/2014

Note : Only test from Test Generator are shown.

After clicking on show report, it will produce the report as shown below:

		Techior Solutions Pvt Ltd Topicwise Analysis Report (Student Level)					
Test Name : UNIT TEST-1							
Student Adm No : 2211044		Student Name : Namita					
Total Marks : 100		Marks Obtained : 25					
Chapter Name	Topic Name	Total Que.	Right Que.	Wrong Que.	Total Marks	Marks Obt.	%
Complex numbers and	Numbers	9	1	8	9	1	11.11
Complex numbers and	Q.equations	10	3	7	10	3	30
Complex numbers and	Integers	17	2	10	17	2	11.76
Complex numbers and	Decimals	16	4	12	16	4	25
Mathematical induction	Numbers	25	12	13	25	12	48
Mathematical induction	Integrations	9	1	8	9	1	11.11
Mathematical induction	Derivatives	7	1	6	7	1	14.29
Mathematical induction	Algorithm	7	1	6	7	1	14.29

Analysis Report:

Here it shows Question wise analysis Report & Topic wise analysis report.

Question Wise Analysis Report:

Select Student name &/or batch name & click on question wise analysis report, it will generate the question wise analysis of the selected batch for the selected test.

Q No	Question Id (in Test Generator)	Attempted by No of Students	% of Correct Answer
1	3	2	100
2	4	2	0
3	6	2	0
4	9	2	0
5	10	2	0
6	15	2	0
7	16	2	100
8	17	2	100
9	18	2	0
10	19	2	0
11	26	2	0
12	30	2	0
13	31	2	0
14	33	2	0
15	39	2	100

Topic wise analysis report:

Select Student name &/or batch name & click on Topic wise analysis report, it will generate the Topic wise analysis of the selected batch for the selected test.

Techior Solutions Pvt Ltd

Topicwise Analysis Report (Batch Level)

Test Name : UNIT TEST-1

Batch Name : Batch-1

Attempted by No of Students : 7

Chapter Name	Topic Name	Total No of Questions	% of Correct Answer
Complex numbers and quadratic equations	Numbers	9	15.87
Complex numbers and quadratic equations	Q.equations	10	30
Complex numbers and quadratic equations	Integers	17	10.92
Complex numbers and quadratic equations	Decimals	16	21.43
Mathematical induction	Numbers	25	29.14
Mathematical induction	Integrations	9	31.75
Mathematical induction	Derivatives	7	16.33
Mathematical induction	Algorithm	7	28.57

Test Result Report:

In this report the total number of questions ,number of questions attempted by the students, negative marks & final marks & grand total of the marks (if the test is of multiple subjects) per subjects can be seen.
